## LITERACY TIP:

The kitchen is a great place for activities around counting and measuring whether you use recipes or not. A "handful" is a measurement! How does the amount in your handful compare to the amount in your child's handful? The bathtub is another great place to play with measurement, pouring water from one container to another.

## TRY AT HOME:

Play "What Fits?"  
Will your hat fit  
under your bed?  
Will the  
refrigerator fit  
in your pocket?
